

19th June 2025

To Whom It May Concern,

The International Energy Agency Technology Collaboration Programme on Ocean Energy Systems (IEA-OES) is an intergovernmental collaboration between member countries to advance research, development, and deployment of ocean energy technologies worldwide. As the Executive Secretary of the IEA-OES, I provide operational support and oversee the coordination and dissemination of activities among our participating countries.

I hereby confirm that Mrs. Stephanie Thornton served as the Australian Alternate Delegate to the IEA-OES from 2018 to 2022. During this time, she actively contributed to the work of the IEA-OES and supported Australia's engagement in international collaboration on ocean energy.

Sincerely,

Dr Ana Brito e Melo
Executive Secretary of the IEA-OES
